Enterprise

## PERMISSION ANALYSIS

### Multi-domain capable

Analyze multiple domains within your company structure.

### Parallel scans

8MAN parallel scan technology allows you to scan your network in minutes.

4 Threads

128 Threads

128 Threads

### Accounts / Active Directory Graph (AD)

Display of access rights and causes in a graphically intuitive mind map.

### Analysis of Active Directory access rights

Understand which users have access rights to individual AD objects.

## DOCUMENTATION & REPORTING

### 8MAN Logbook

Complete chronological overview of all 8MAN activity on Active Directory, file servers, SharePoint and Exchange.

### Current access reports

- Reports on:

- Which users have access to a given resource?
- Which resources can a user access?
- Account detail report
- Scan comparison: report showing effective changes between two points in time

### Scheduled Reports

Automatically generate and send scheduled reports.

### Purpose Groups

Give your Active Directory groups meaningful names or aliases that indicate their purpose.

## USER PROVISIONING

### User Creation

Standardize user provisioning through data owners and helpdesk.

### Access Rights Management

Change access rights and Active Directory Groups via drag & drop.

### Manage Active Directory accounts

- Change AD attributes
- Reset passwords
- Activate, deactivate and delete accounts
- Set "out of office" notices in Exchange
- Change access rights and AD Groups via drag & drop

### Group Wizard

Automatic generation of AD groups according to Microsoft best practice, when assigning file server access.

### Temporary access rights

Decide when access rights should be activated and when they should expire.

## TECHNICAL INTEGRATION

### SharePoint

Analyze, report and administrate access rights to SharePoint.
